

coDiagnostiX®

Implant Planning Software
EASY & EASY CHAIRSIDE

Predictable and consistent results.

Market-proven and established solution.

300,000+ CASES

20+ YEARS

coDiagnostiX is a flexible and easy-to-use digital solution for implant planning and the design of customized and highly-precise surgical guides. Benefit from predictable results while minimizing the number of patient visits.

Enhanced confidence and peace of mind.

Improved patient experience.

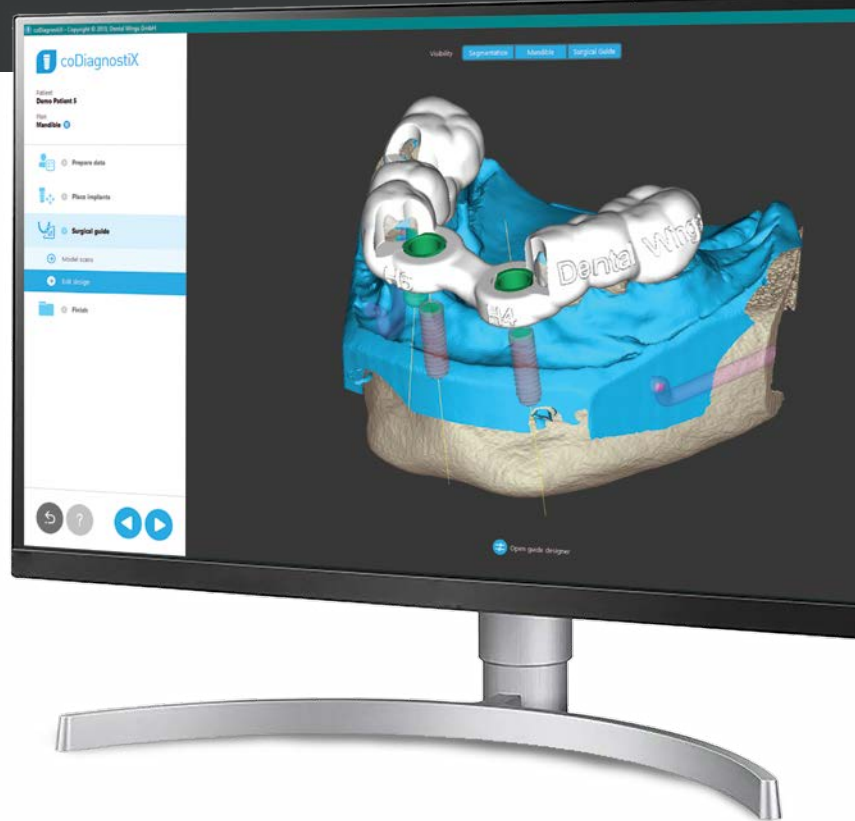

Reduced treatment time.

Comprehensive case documentation.

Quick turnaround times due to local lab or in-house production.

Design highly-precise and customizable surgical guides.

- Time-saving guide design wizard.
- Surgical guides with tooth, gingiva or bone support, plus combined variants.
- Surgical guides can be produced in-house, by your local lab, or by centralized service providers.

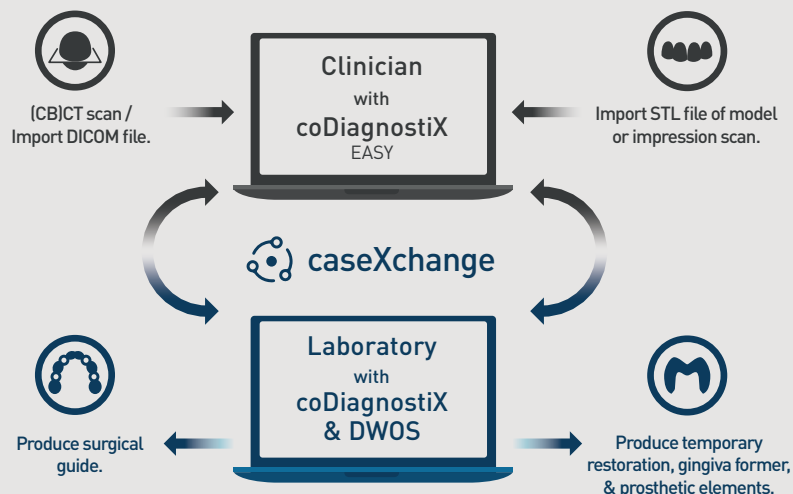

Benefit from a completely digital workflow and versatile solution.

- No scan template required thanks to a completely digital workflow.
- Compatible with all open (CB)CT, intraoral, model, and impression scanners, plus open CAD/CAM solutions.
- Includes a regularly updated library of implant, sleeve, and abutment systems from multiple manufacturers.

A solution tailored to your individual needs.

coDiagnostiX EASY was designed to address the needs of clinicians who mainly treat standard cases or who outsource services to a lab or planning center.

coDiagnostiX EASY CHAIRSIDE offers chairside functionality by supporting in-clinic printing of surgical guides.
