## Dental Wings Software Solutions Now Accepting Scans by Carestream CS 3600 Intraoral Scanner

FOR IMMEDIATE RELEASE

**Montreal, Canada, 11 July 2018** - Dental Wings and Carestream Dental (ATLANTA, USA) are pleased to announce that the CS 3600 intraoral scanner has been certified by Dental Wings for use with DWOS® and DWOS Chairside Design Software, as well as coDiagnostiX® Implant Planning Software.

Scans obtained by the CS 3600 can now be imported into **Dental Wings DWOS** and **DWOS Chairside Design Software**, and/or **coDiagnostiX Implant Planning Software**, providing CS 3600 and DWOS users, along with dental laboratories with new options for their digital design workflow, including crown and bridge, implant, and denture planning, as well as guided surgery planning, splint design and orthodontic archiving.

“This latest certification for Dental Wings DWOS reflects our ongoing commitment to broaden accessibility to our range of open software solutions for chairside, lab and central milling, through partnerships with other key market players,” said Michel Divet, EVP Sales and Marketing, Dental Wings.

**DWOS** is one of the most flexible and powerful CAD/CAM software platforms available for the design of dental restorations. It offers an open and integrated ecosystem of technologies that work together to boost productivity and efficiency for dental professionals.

**DWOS Chairside** uses the latest innovative technology and special design tools to facilitate the in-office design of highly-esthetic restorations, including inlays, onlays, full contour crowns, veneers, and implant abutments.

**coDiagnostiX** is a proven and simple solution for pre-operative planning and drill guide design, and fully integrated to DWOS through the DWOS Synergy communications feature.

#### About Dental Wings

Dental Wings is a leading provider of digital dentistry technologies. Products and solutions cover the full digital workflow from treatment-planning to final restoration including dental scanning, implant planning, prosthesis design, manufacturing, and communication among dental professionals.

Founded in 2007, Dental Wings is headquartered in Montreal (Canada) with additional offices in Berlin and Chemnitz (Germany), Lyon (France), and Shenzhen (China), and employs a staff of over 170. A fully-owned company of the Straumann Group since August 2017, Dental Wings products are distributed by leading dental companies in over 50 countries around the world. The company's vision is to create the largest global network of digitally-enabled dental professionals, and equip them with diagnostic, design, and manufacturing tools that increase the efficacy, quality, and profitability of the services they provide to patients.
